### **DETAILED ACTION**

**Claims 1-19** are pending in this Application.

#### ***Response to Remarks***

Applicant's election without traverse of Group I, **Claims 1-16** and species of Example 7.10, found at p. 91 of the Specification, in the reply filed on May 9, 2007 is acknowledged. Accordingly, **Claims 17-19** are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim.

#### ***Scope of Elected Subject Matter (Scope of Subject Matter Searched)***

Applicant's elected species was found to be free of the prior art. The scope of the elected subject matter is compounds of formula (I), wherein:

- $R^1$ ,  $R^2$ ,  $R^5$ , and  $R^6$  are as defined;
- $R^3$  is phenyl; and
- $R^4$  is phenyl.

This scope of compounds is not free of the prior art and gives rise to rejections under Double Patenting.

#### ***Scope of Non-Elected Subject Matter (Scope of Subject Matter NOT Searched)***

The remaining subject matter which was not outlined in the scope of the elected subject

Art Unit: 1626

matter listed above is nonelected subject matter and is withdrawn from further consideration.

This subject matter is patentably distinct from the elected subject matter, such that the nonelected subject matter would not anticipate nor render the elected subject matter obvious.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1626

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

**Claim 1** is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over **Claim 8** of U.S. Patent No. 6,855,710, issued Feb. 15, 2005; **Claim 2** of U.S. Patent No. 7,169,936, issued Jan. 30, 2007. **Claim 1** is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over **Claim 5** of copending Application No. 11/470,716.

Specifically, **Claim 1** of the instant Application is anticipated by **Claim 8** of the '710 patent, **Claim 2** of the '936 patent, and **Claim 5** of the '716 Application, each of which disclose compounds encompassed by the Markush language of **Claim 1** of the instant Application. As this ODP rejection is grounded in anticipation rather than obviousness, no obviousness rationale need be presented here.

### ***Objections***

Claims 1-16 are objected to for containing nonelected subject matter.
